Community Members		

The purpose of this meeting was to inform the community about the Year 3 combined sewer overflow control project and receive public input regarding the Year 3 project. The meeting began with an introduction to CSO definitions and a short video describing how combined sewers work. The project team presented information on Peoria's CSO background, project goals, project location, soil infiltration testing, CSO program modeling, and draft green infrastructure types and layout locations for the Year 3 project. The PowerPoint slides from the presentation are attached.
